

SYSTEM FOR SUPPLY OF A PRESSURIZED GAS AND METHOD FOR VERIFYING THAT A COMPRESSOR IS ACTIVE IN A SYSTEM FOR SUPPLY OF A PRESSURIZED GAS

Abstract

System for supply of compressed gas including one or more pressure tanks (6), a compressor (2) which can be controlled via first control member (7) and is arranged to supply the pressure tank or pressure tanks (6) with compressed gas, where the first control member (7) is arranged to adopt an active position when the compressor (2) is controlled to operate. Compressed gas is delivered to the pressure tanks, and a passive position when the compressor (2) is controlled not to operate.
